### **DETAILED ACTION**

1. This action is in response to the amendment filed on January 14, 2005.
2. Claims 1, 11, and 21 remain rejected under nonstatutory double patenting rejections. The *35 USC § 103* rejection of claims 1 – 21 has been withdrawn. Accordingly, the remaining dependent claims 2 – 10, and 12 – 20 are objected to as being dependent upon a rejected base claim.

#### ***Information Disclosure Statement***

3. The Information Disclosure Statement submitted on December 7, 2004 is acknowledged. Accordingly, the IDS has been considered by the examiner.

#### ***Double Patenting***

4. The nonstatutory double patenting rejection is based on a judicially created doctrine grounded in public policy (a policy reflected in the statute) so as to prevent the unjustified or improper timewise extension of the "right to exclude" granted by a patent and to prevent possible harassment by multiple assignees. See *In re Goodman*, 11 F.3d 1046, 29 USPQ2d 2010 (Fed. Cir. 1993); *In re Longi*, 759 F.2d 887, 225 USPQ 645 (Fed. Cir. 1985); *In re Van Ornum*, 686 F.2d 937, 214 USPQ 761 (CCPA 1982); *In re Vogel*, 422 F.2d 438, 164 USPQ 619 (CCPA 1970); and, *In re Thorington*, 418 F.2d 528, 163 USPQ 644 (CCPA 1969).

A timely filed terminal disclaimer in compliance with 37 CFR 1.321(c) may be used to overcome an actual or provisional rejection based on a nonstatutory double patenting ground provided the conflicting application or patent is shown to be commonly owned with this application. See 37 CFR 1.130(b).

Effective January 1, 1994, a registered attorney or agent of record may sign a terminal disclaimer. A terminal disclaimer signed by the assignee must fully comply with 37 CFR 3.73(b).

Art Unit: 2193

5. Claims 1, 11, and 21 are provisionally rejected under the judicially created doctrine of obviousness-type double patenting as being unpatentable over claims 1 and 4 of copending Application No. 09/657661 in view of Dougherty et al., U.S. Patent 6,370,575 (hereinafter referred to as Dougherty). The conflicting claims represent the same invention and differ by features that would have been obvious to one of ordinary skill in the art. Specifically:

**In reference to claims 1 and 21**, these claims recite a project definition including: a plurality of function portions each defining an input port and an output port, a source portion identifying a data source and data destination, and binding information associating an input port with an output port, all taught in claim 1 of the '661 application, which does not call for "a communications link." However, Dougherty teaches a web-based communication system allowing deployment and execution of a project definition file over a communications link (Abstract; column 10, lines 13 – 19). Therefore, it would have been obvious to one skilled in the art to combine the recitation of the '611 application with the teaching of Dougherty thus enhancing the '611 application so the definition files might be loaded and executed remotely through a communications link. Although, the combination of application '611 and Dougherty is provided with a separate application program wherein a function identifies a command (application '611), the combination will function the same without separate application program as referenced to claim 1.

**In reference to claim 11**, this claim recites a computer-readable medium corresponding to the features of claim 1, which has been rejected as set forth above. Thus, it also would have been taught in claim 4 of the '661 application in view of Daugherty as set forth above.

This is a provisional obviousness-type double patenting rejection.

***Claim Rejections - 35 USC § 103***

6. Applicant's arguments, see pp. 7 – 14 of the Applicant's Remarks filed on 1/14/2005, with respect to claims 1 – 21 have been fully considered and are persuasive. The **35 USC § 103** rejection of claims 1 – 21 has been withdrawn.

***Conclusion***

7. **THIS ACTION IS MADE FINAL.** Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire **THREE MONTHS** from the mailing date of this action. In the event a first reply is filed within **TWO MONTHS** of the mailing date of this final action and the advisory action is not mailed until after the end of the **THREE-MONTH** shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than **SIX MONTHS** from the mailing date of this final action.
